

Alagu Suriya S

Software Engineer — Data Engineering & Full Stack Development

Dindigul, Tamil Nadu, India — +91 9597478911 — suriyanlk18@gmail.com

LinkedIn — GitHub — Portfolio

Summary

Software Engineer with hands-on experience in full-stack development and data engineering, including ETL pipeline development, backend systems, and scalable web applications. Skilled in Java, SQL, PySpark, Talend, and MERN stack with expertise in data transformation, API development, and workflow optimization. Proven ability to build production-ready systems and improve performance through efficient system design.

Technical Skills

Languages:	Java, Python, SQL, JavaScript
Frameworks:	React.js, Node.js, Express.js
Databases:	MySQL, MongoDB
Technologies:	REST APIs, XML, JSON, PySpark, Talend, ETL Pipelines
Frontend:	HTML, CSS
Tools:	Git, GitHub, Eclipse, Figma

Experience

Full Stack Developer

Jan 2026 – Present

Mahix Infotech, Coimbatore

- Led full stack development using MERN, PHP, and MySQL, delivering 3+ production-ready applications.
- Engineered a Room Booking System that automated reservation and reporting workflows, improving operational efficiency by 30%.
- Developed an E-Commerce platform with secure payment integration and backend product management, improving transaction reliability.
- Built a Retail Management System for real-time inventory tracking, GST handling, and customer transactions.
- Optimized backend APIs and database queries, reducing response time and improving system performance.
- Collaborated with clients and stakeholders to gather requirements and deliver scalable software solutions.

Data Engineer / Product Engineer Intern

Jun 2025 – Sep 2025

Dataswitch, Chennai

- Developed and optimized ETL data pipelines using Java and Talend, reducing processing time by 25%.
- Implemented XML to JSON transformation logic for structured data integration across systems.
- Diagnosed and resolved production issues (RFCs), improving system stability and reducing failures.
- Re-architected Talend workflows to efficiently process complex XML datasets into structured formats.
- Collaborated with cross-functional teams to debug, validate, and enhance data pipeline performance.

Projects

Election Booth Management System (Web + Mobile)

2026

Mahix Infotech — PHP, MySQL, Java (Android), REST APIs

- Engineered a real-time booth monitoring system with live police tracking and dynamic assignment of officers to booths.
- Designed an admin dashboard to monitor booth status, track police locations, and handle incident-based allocation.
- Integrated Android application for continuous location updates and real-time communication with backend APIs.
- Enabled rapid response by identifying nearest available officers for issue resolution at polling booths.
- Live: mahixinfotech.in/booth

Institute ERP Management System

2026

Mahix Infotech — PHP, MySQL, Full Stack Development

- Developed a centralized ERP platform managing students, staff, courses, fees, and attendance.
- Architected admin panel for streamlined control of institutional workflows.
- Consolidated scheduling, fee tracking, and attendance into unified modules.

- Designed scalable database structure for efficient reporting and data access.
- Live: mahixinfotech.in/erp

Movie Ticket Booking System

2025

Mahix Infotech — PHP, MySQL, JavaScript, HTML, CSS

- Built an end-to-end ticket booking platform with seat selection and show scheduling.
- Engineered booking workflow covering pricing, availability, and confirmation.
- Structured backend logic to handle concurrent bookings efficiently.
- Delivered responsive UI for seamless user interaction.
- Live: mahixinfotech.in/ticket

Hotel POS (Point of Sale) System

2026

Mahix Infotech — React.js, Backend APIs, MySQL

- Built a production-grade POS system handling billing, orders, and transaction workflows.
- Automated invoice generation and enabled real-time order tracking for hotel operations.
- Delivered an intuitive UI reducing staff effort and minimizing operational errors.
- Improved transaction speed through optimized backend communication.

Startup Investor Platform

Sep 2024 – Nov 2024

Freelance Project — React.js, Node.js, REST APIs

- Developed a full-stack platform enabling startup–investor discovery and interaction.
- Designed scalable REST APIs to support dynamic data exchange.
- Improved user engagement through optimized UI and workflow experience.

Education

B.E. Computer Science and Engineering

Jul 2022 – May 2025

Anna University (SSMIET), Dindigul
CGPA: 7.0

Diploma in Mechanical Engineering

Jul 2019 – May 2022

Government Polytechnic College, Coimbatore
Percentage: 72
